SUMMARY

I am a lover of science and technology. My main interests are to study algorithms and to follow in the area of Artificial Intelligence, where I intend to use these skills to create innovative projects.

EXPERIENCE

A final project where it was developed a system for Residential Automation. The most important was putting into practice what has been studied throughout the course and make the students work as a team with versions systems.

EDUCATION

College Mauritius of Nassau – Campina Grande/PB

Technologist in Analysis and Systems Development

Graduated in December 2015
